The World of Hangcha
Innovative, reliable lithium-ion technology (Lithium Iron-Phosphate), which are developed jointly by HANGCHA and CATL. Battery cells and modules are from CATL, with reliable quality, exclusively for HANGCHA.

- We use square lithium iron phosphate batteries and modules used in large quantities by commercial vehicles in mature economies.
- The module uses an aluminum alloy frame which is sturdy, lightweight and with excellent heat dissipation.
- Safe and effective: Charging efficiency as high as 98%, thermal runaway temperature 600°C or above.
- Adapted to low temperatures: Comes standard with an electrical heating feature, ensuring normal operation in low temperatures.
- Quick charging: Can charge and operate at the same time, fully charged in 2 hours.
- Long-working: 4000 charging cycles, capacity retention greater than 80%.
- Maintenance-free: Battery does not require manual maintenance.
- Safe and clean: Pollution-free, zero emissions.

HANGCHA provides Li-ion battery (LiFePO4) with 5 years or 10000 hours warranty.

Rapid charging and opportunity charging ensure continuous availability of vehicles.

Li-Ion powered forklifts are always available. They allow for fast full charging or boost charging (100% charge in 2 hours). They are maintenance free and do not require a battery change when used for multi-shift operations.
A series Electric Tow Tractor

As for A series of tractors, the advanced AC drive control technology is adopted for the complete tractor. The tractor has excellent performance, can be operated comfortably, is safe and reliable, has low maintenance cost and is the high-efficiency tool for resolving material transport among different zones for the workshops, flow lines and large factories.

Appearance

/ The professional appearance industrial design is adopted. The complete tractor has smooth lines, presents the dynamics. The ergonomics is fully considered to meet the latest appearance design fashion.
/ The steel plate stamping and injection moulding technology is used extensively, the tractor is firm and durable and can meet the environmental protection requirements.

High performance

/ For the stand-up driving tractor, the electronic power steering is taken as the standard configuration to achieve easier and more flexible operation and control.
/ The AC traction motor features excellent acceleration performance, outstanding climbing ability, low heat emission, and is brushless, and maintenance-free.
/ The advanced AC control system realizes accurate and stable control, and higher efficiency.
/ The CANBUS bus structure makes communication of the entire machine faster and more reliable.

Comfortability

/ LED headlight is taken as the standard configuration; the headlight has good appearance and offers bright light.
/ Multifunctional instrument is taken as the standard configuration, has such many functions as speed selection and so on, and can clearly display different information of the tractor.
/ The suspension structure is adopted for the front axle and rear axle to greatly enhance the operator's comfortability during tractor traveling.
/ USB charging port and mobile phone placement slot are taken as the standard configuration for conveniently charging the mobile phone and providing convenience for the operator.
/ The advancing and retreating buttons are provided at the tail of the tractor body, so that the tractor can be operated to move forward and backward while manipulating the traction device and it does not need to frequency go aboard and get off during operation.
Reliability
- The three-support-point and low-gravity-center design is adopted. The high-strength steel plate framed structure is adopted for the chassis. The tractor has long service life.
- All of safety and cables are provided with reliable protection, and the electrical system reliability is greatly improved.
- Such important components as switches, connector clips, instruments and so on are imported from foreign countries, and have excellent performance and reliable quality.

Safety
- Turning slow down function is taken as the standard configuration to guarantee stable and safe turning of the tractor.
- The Electronic Parking Brake (EPB) is taken as an standard configuration to achieve greater convenience and safety.
- The safety pedal is taken as standard configuration. The other operations can be made only if the pedal is trampled. In this way, safety is enhanced.

Maintenance
- The brushless, maintenance-free AC motor reduces operation cost significantly.
- The meter integrating battery indicator, timer, and fault self-diagnosis is convenient for maintenance.
- The front bottom plate and rear cover plate can be conveniently maintained.

Standard specification
- AC traction motor
- Automatic deceleration at turns
- Key switch
- USB charging port
- Traction device
- Electrical Park Brake (EPB) system
- Emergency power-off switch
