

Features

Truck	Standard	Options
1150mm fork length-570mm outside fork width	●	
PU load wheel	●	
Electronic lifting limitation	●	
Maintenance-free Lead-acid battery	●	
Iron-Phosphate lithium battery	●	
Build-in charger	●	
Upright-tiller creep speed	●	
Dual load wheels	●	
1150mm fork length-690mm outside fork width		○
Controls and instruments		
Metric instrument	●	
SOC instrument	●	
Imperial instrument		○
Optional features of weighing instrument: Printing, Bluetooth and Wifi		○
Safety		
Emergency disconnect switch	●	
Horn	●	
Interlock switches use non-contact proximity switches	●

A SERIES

ELECTRIC PALLET TRUCK WITH
WEIGHING SYSTEM

With capacity of 1,500 to 2,000kg

A SERIES ELECTRIC PALLET TRUCK WITH WEIGHING SYSTEM

The A Series 1.5t-2.0t electric pallet truck with weighing system is a new generation product developed by Hangcha for warehouse logistics applications. It adopts the latest permanent magnet drive technology, offering advanced performance, comfortable operation, and high reliability. It features a high-performance weighing system with high precision and stable weighing, digital high-definition display, and anti-collision design for higher reliability.

APPEARANCE

- The A Series mini pallet truck adopts professional industrial design, with smooth lines, dynamic shape, compact size, and ergonomics in mind, in line with the latest design trends.
- It extensively uses sheet metal stamping and injection molding processes, making it robust, durable, high-grade, and environmentally friendly.

COMFORT

- The built-in charger is designed for easy charging (Std.).
- The truck has compact size, lightweight, and highly maneuverable, with a upright-tiller creep speed feature, allowing operation in very narrow passages, such as inside containers.
- The lithium battery can be easily removed from the side for convenient replacement.

The optimized structure ensures excellent operator visibility.

HIGH PERFORMANCE

- Powerful, with a load capacity of 1.5/2.0 tons, meeting the handling needs of the vast majority of customers.
- The truck adopts permanent magnet traction motor with excellent performance and low heat generation.
- Permanent magnet control system for outstanding control performance, high efficiency, and stability.

Key components such as controllers, handles, hydraulic pump stations, switches, connectors, and instruments are all mature and stable products.

It adopts a high-performance weighing system with four built-in sensors for high precision and stable weighing, with a measurement error within 0.5%.

PROTECT YOUR INVESTMENT

SAFETY

- It features release braking, reverse braking, and emergency braking to ensure driving safety.
- Hill descent protection ensures operational safety.

Standard electronic lifting limit and intelligent limit protection from the controller avoid impact when lifting to the top, effectively protecting the working motor and the safety of the cargo.

The emergency reverse button at the head of the tiller can effectively prevent the operator from injury when driving backward in an emergency.

MAINTENANCE

- Lead-acid models come with maintenance-free batteries, eliminating the need for maintenance.
- SOC of the battery display prompts users to charge in a timely manner.
- The hood can be easily opened for clear visibility of components, making maintenance very convenient.
- All pivots are equipped with lubricated bushings and oil cups for easy maintenance and long service life.

RELIABILITY

- The truck adopts a three-point design with additional wheels for safety and reliability.
- The mast system is optimized for smooth and reliable operation with minimal stress.
- All plugs use well-known brands, and all wires and cables are reliably protected, greatly improving the reliability of the electrical system.

Mature and stable hydraulic power units with low noise, low vibration, and smooth and reliable lifting and lowering.

High-strength forks with higher strength and impact resistance, combined with fork tip guidance to further improve work efficiency.

Interlock switches use non-contact proximity switches for extremely high reliability.

RELIABLE LITHIUM-ION TECHNOLOGY

FEATURES & BENEFITS THE HANGCHA DIFFERENCE

Safety

- / Intelligent battery management monitoring every important function.
- / Higher user safety, thanks to acid-free use.
- / User friendly due to avoided battery change.
- / No emission of battery gasses.

Efficiency

By quick opportunity charging any downtime, such as a lunch break, can be efficiently used and the battery is recharged in a very short period of time. Interim charging does not affect the battery service life.
