HANGCHA GROUP CO., LTD. reserves the right to make any changes without notice concerning colors, equipment, or specifications detailed in this brochure, or to discontinue individual models. The colors of trucks, delivered may differ slightly from those in brochures.

The World of Hangcha

Frame

- / Vertical sides help the driver work safely with less damage, even in an area with low-level obstructions.
- / Thick chassis plates resist distortion, reduce damage and minimise refurbishment costs.
- / The wide mast, low scuttle and high seating position gives the operator an excellent view of the forks and of the way ahead-reducing load damage and accidents.
- / Well positioned lights ensure optimum vision to both the front and back-essential in containers.
- / Much attention has been given to the carriage design, with an integral fork positioner.

Non-slip Floor and Step

- / The wide-open step is not only convenient to access but safer thanks to anti-slip mats. To further improve safety in demanding work conditions, the floor board is constructed of embossed steel to reduce the possibility of slipping.

Easier Maintenance and Servicing

- / Along with the kind of engineering that promises unsurpassed performance and productivity in all applications, our forklifts are designed with many features that facilitate maintenance and servicing. For example, the wide-opening top panel and radiator cover are equipped with gas stays and convenient hand grips that enable quick access to the engine compartment.

Options

- / 2.5-6.0m duplex mast
